

# SoCal Dog Training Tips & Tricks

## FREE SOLUTIONS:

This article reflects years of research from thousands of books, internet articles, and training sessions. Although these practices can help you with your dog issues, they do not all reflect the training practices of SoCal Dog Training's proprietary methods. Please visit our training philosophy page to discover our method of training.

## PERSONALIZED TRAINING:

With so many training programs out there, it can become more and more difficult to get a solution that is tailored for your situation. We offer personalized training for whatever situation you might be facing with your puppy. The tips and tricks provided in the article are for general use, if you are looking for more specific help, please contact us today!

Although spaying and neutering cannot eliminate the causes outlined below, it can help to reduce these issues spaying and neutering definitely a great supplemental approach to behavior modification.

## Behavioral Benefits of Spaying & Neutering Your Dog

### Mounting

Mounting behavior is normal for intact dogs. Spaying or neutering your dog will help to prevent, but not eliminate it. If your dog continues to mount after it has been spayed or neutered, it is most likely doing so because of dominance issues. If this is happening to your dog, please set up an online consultation with us. You can also purchase our manual, "The Cure for Mounting."

### Marking

Marking (or urinating) inside of the home is likely to be reduced once your dog is spayed or neutered. If your dog continues marking inside the home, after it has been spayed or neutered, please setup an online consultation with us! You can also purchase our instructional manual, "Housebreaking Your Dog in One Week."

### Aggression

Aggression issues in an intact male can be related to the production of testosterone. Therefore, once your dog has been neutered, aggression problems can be lessened. If aggression problems still exist after your dog has been neutered feel free to contact us for a consultation. You can also purchase our instructional manuals, "The Cure for Aggression toward Children" or "The Cure for Food Aggression." Both manuals address different situations where aggression may occur. As a preventative measure, these manuals are suggested even if you do not have a problem with aggression. Remember, aggression is much easier to prevent than it is to cure!

### Cancer

In fact males have a high incident of testicular cancer. Neutering your dog will help save his life!

Although spaying and neutering cannot eliminate the causes outlined below, it can help to reduce these issues spaying and neutering definitely a great supplemental approach to behavior modification.

## Behavioral Benefits of Spaying & Neutering Your Dog

Many people believe that that it is more humane to let their dog stay intact than it is to spay or neuter. As you can see from what you just read, the benefits of spaying or neutering outweigh the benefits of keeping your dog intact. Your dog will be less frustrated and less likely to bite you , a family member, a child or another dog. Spaying and neutering will also help housebreaking and will serve to extend the life of your dog. But please remember that spaying and neutering is only a supplemental approach to behavior modification and will not completely eliminate these problem behaviors. If you are experiencing behavior problems that have not been controlled by spaying or neutering, please set up an online consultation with the us and we can do our best to help you with your behavioral issues.
